Advanced Features

Unified Communications

Geographic Flexibility

High Compatibility

Budget Friendly and Future Proof Cloud-based Phone System

With One-Cloud PBX, all you need is a VoIP-enabled phone or softphone and you ready to go. Your service provider performs all updates and maintenance to keep the system up to date.

New users can be added at any time as needed. Most service providers charge on a simple per-user basis so that you only pay for what you needed and have a business phone system that grow with your business.

Work From Home, Work From Anywhere

With Linkus App, your Windows desktops and iOS & Android mobile devices can work as office extensions with all phone system features accessible, enabling real-time communication across multiple devices. Unified Communications features like presence, instant messaging, CRM integration, conference and unified messaging are all at your disposal.

Linkus UC Softphone

One Number, Many Devices

- Connect up to 4 devices
- Synchronize call history across devices
- Incoming Call
- Outgoing Call
- Missed Call
- Integrate with your mobile contact

The diagram illustrates the Yeostar UC Solutions cloud PBX system. At the center is a cloud labeled 'Yeostar UC Solutions' with 'DDI Range: 6309180-1199'. Three scenarios are shown:

- Office:** A person at a desk with an 'Office IP Phone: 1190'. A call from 'Customer Call 63091190' is shown entering the cloud.
- Work From Home:** A person sitting on a sofa with a 'Linkus Desktop Client: 1190'. A call with '63091190' is shown entering the cloud.
- Work Anywhere:** A person with a suitcase and a 'Linkus Mobile Client: 1190'. A call with '63091190' is shown entering the cloud.

All-inclusive PBX Features without Any Extra Cost

Geographical Flexibility for Multi-site Organizations

With One-Cloud phone system, you are able to unify the headquarter with remote offices and a handful of teleworkers within a single PBX system, giving geographically dispersed employees the same features and continuity as in-house uses.

Compatible with SG SIP trunks and Mainstream IP Phones

SG SIP trunks are at your choice while connectivity with PSTN, E1/T1/PRI, ISDN BRI, and GSM/3G/4G are also supported through Yeastar VoIP Gateways. Support most mainstream IP phones with Auto-provisioning.

Advantages of One-Cloud Solution:

- **Simplify License, with Cheaper License Cost**
 - **One User - One number - Many devices**
Each user will have One-number and can be logged-in concurrently up to 3 devices (Hard-phone, Mobile and Desktop)
 - Synchronize of call record across devices (Loss, Missed or Dialed)
Note: Some other solutions provide different numbers for different devices
- **Bring Your Own Trunk**
You own the number forever with a peace of mind when you change new system, as there will not be any number portability required
- **Peace of Mind Solutions**
We provide OPTIONAL bundle which is inclusive of UC, IP-Phone and network (PoE switches)
- **Inclusive of Voice recording and Voice Mail, Remote and Onsite Support**
