

Rainbow Hub by Alcatel-Lucent

A superior communication platform combining a SIP trunk of your choice with real-time collaboration

Rainbow™ Hub by Alcatel-Lucent is a next-generation, real-time communications and collaboration platform. Leverage the power of a truly cloud-based PBX system combined with a best-in-class unified communication platform. Cloud-based PBX solutions simplify communications by minimizing the operational effort traditionally required for on-premises systems. Simplify your communications with one platform to fulfill all your needs.

A tool for digital transformation:

Whether for hybrid work and mobility, working better together, enhancing the customer experience, or strengthening engagement, Rainbow Hub provides the communications and collaboration tools enterprises need to accomplish their digital transformation. A comprehensive all-in-one cloud service, including telephony, collaboration, and videoconferencing.

- **Telephony:** All the features for quality telephone reception, opening schedules, interactive voice server, call groups, dashboards and statistics, integration with third-party applications, operator console and much more.
- **Additional capabilities:** Advanced cloud call management, detailed call history, real-time supervision tools, customizable call routing rules, queue monitoring, performance indicators, and enhanced voicemail features including voice-to-text transcription.
- **Collaboration:** All the features for working better together. Secure group messaging for up to 300 internal and external participants per group (bubble), timestamped messages accessible 24/7, message qualification tags (standard, information, important), storage space, information channels for large broadcast groups open to internal or external subscribers.
- **Video conference:** Simple audio/video conferences on-the-fly or scheduled, up to 120 participants and 49 simultaneous videos, internal and external participants, conference accessible using application and browser, speaking time.
- **Analytics:** Comprehensive reporting and dashboards providing visibility into call activity, service usage, performance indicators, and user engagement. These insights help optimize telephony operations, monitor service quality, and support data-driven decision-making.

Operator’s services (PSTN):

Rainbow Hub is supplied without operator service (telephone number and minutes of communication) and offers the option of a carrier connect. Please contact your integrator / ALE Business Partner for further information.

- **Carrier Connect:** a native SIP Cloud-to-Cloud integration with a list of certified operators available directly from the Rainbow Hub admin portal. Please contact sales to know the certified operators available in your region.

AI-powered collaboration

Delivers native, Europe-hosted AI to enhance meetings with automated transcription, structured post-meeting summaries, and upcoming real-time features such as live captioning. All designed to improve information retention, sharing, and follow-up.

AI-integrated telephony

Extends visual voicemail with automatic voice-to-text transcription, giving users instant written access to voicemail for faster review and response.

It’s easy to understand with four levels of services:

	Voice Phone	Voice Business	Voice Enterprise	Voice Attendant	Voice Premium*
Telephony services					
Any device, anywhere: All telephony features; available on PC, smartphone, and desktop phones	Phone only	●	●	●	●
Second call, back and forth, attended, and blind transfer, 10-party calls, call forward	3-party-calls-max	●	●	●	●
Welcome services (voice prompts, 3-level IVR, calendars)	●	●	●	●	●
Monitoring and pickup of calls to other user(s)	●	●	●	●	●
Manager / Assistant filtering	●	●	●	●	●
Hunt groups, sequential, cyclic, parallel and call overflow on busy or no response, with or without waiting queue	●	●	●	●	●
Voice mail with visual notification	●	●	●	●	●
Record all calls	●	●	●	●	●
CRM connect: Integrate Rainbow Hub with your CRM, contextualize your communications	ND	Optional	Optional	Optional	Optional
Contact center agent	Advanced queuing
